Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,679,403 to Yoshida et al in view of U.S. Patent No. 5,182,922 to Allread et al. Yoshida et al discloses the claimed invention of a heat pump system. However, Yoshida et al does not disclose the flexible conduits for connecting the various components of the system. Allread et al teaches in Fig. 1 that it is old and well known to connect the various components of a refrigeration system with flexible conduits H. Thus, it would be obvious to connect the various components of the heat pump system of Yoshida et al with flexible conduits, in view of Allread et al, to yield the predictable result of using inexpensive conduits for the heat pump.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
